-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 January 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. Claims 11-26 and 33-35 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 1/27/05.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 5-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5 recites the limitation "means for receiving the individual object" in lines 1-

2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3721

5. Claims 1-10 and 27-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Green, Jr. et al. (US 4,862,905) in view of Schubert et al. (US 3,834,285).

Green, Jr. discloses an apparatus and method for inserting objects in a continuous supply of rod filler material 22 by rotating disk member 50; air jet 155 for insertion/assuring ejection; and then subdividing the continuous rod at predetermined intervals. Green, Jr. does not directly disclose a horizontal rotatable pan with a plurality of stems to lift objects, however Schubert et al. teach a rotatable pan with stems 119 lifting objects 11 through holes for joining cigarette filter plugs; see figure 5. It would have been obvious to one of ordinary skill in the art to use the rotatable pan and stem transfer method and apparatus in the invention to Green, Jr. in order to deliver objects to the vertically rotatable member for subsequent insertion into the filler material.

Regarding claims 10 and 32, Green, Jr. discloses that the cutting assembly severs the rod at intervals synchronized with the insertion of pellets by a suitable manner; see column 9, lines 1-10. The examiner takes Official Notice that visually detecting the objects is such a suitable manner and would have been obvious to one of ordinary skill in the art to use a visual detection system.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
